PRODUCT DATA
Preparation Date: July 2007

DESCRIPTION
Citrus Burst® 8 is a unique blend of vegetable esters, citrus terpenes, and surfactants. This product has a high flash point (>150°F) and is non-hazardous. It is not SARA reportable. It is a reduced VOC formulation with a KB value greater than mineral spirits and other traditional solvents. Citrus Burst® 8 is an excellent degreaser with a light citrus fragrance. It can be rinsed with water or diluted at the time of use to make a time release macro-emulsion.

Citrus Burst® 8 is bio-based and contains no ozone depleting chemicals (ODCs) or hazardous air pollutants (HAPs). Specific formulation guidance and technical assistance is available.

USES AND APPLICATIONS
Citrus Burst® 8 works well as a degreaser for household and institutional uses and is excellent for removing oil, tar, and asphalt, as well as heavy petroleum bitumen from oil drilling rigs and equipment.

SECTION 1: PRODUCT AND COMPANY IDENTIFICATION

Product Name: Citrus Burst® 8
Product Code: 9090019
Issue Date: July 2007

Manufacturer: Florida Chemical Company, Inc.
Address: 351 Winter Haven Blvd., NE
Winter Haven, FL 33881-9432
(863)294-8483 (9 a.m. to 5 p.m ET)

For emergencies, call Chemtrec anytime at 1-800-424-9300.
Outside US, call Chemtrec Collect at 703-527-3887.

SECTION 2: HAZARDOUS IDENTIFICATION

Appearance/Odor: Yellow liquid with citrus aroma.

Product is Combustible.

Emergency Overview
Slippery when spilled.

Potential Health Effects: See Section 11 for more information.
Likely Routes of Exposure: Eye contact, skin contact, inhalation.
Skin: May cause slight redness. Prolonged or repeated exposure may cause drying of the skin.
Inhalation: May cause nose, throat, and respiratory tract irritation, coughing, headache.
Ingestion: Not likely to be toxic, but may cause vomiting, headache, or other medical problems.
Medical Conditions Aggravated By Exposure: May irritate the skin of people with pre-existing skin conditions.
This product does not contain any carcinogens or potential carcinogens as listed by OSHA, IARC, or NTP.

OSHA Regulatory Status
This material is combustible, which is defined as having a flash point between 100°F (37.8°C) and 200°F (93.3°C). Combustible materials are hazardous according to the OSHA Hazard Communication Standard (29 CFR 1910.1200).

SECTION 4: FIRST AID MEASURES

Eye Contact: Remove contact lenses at once. Flush with water for at least 15 minutes. If irritation persists, seek medical attention.

Skin Contact: Wash affected area with copious amounts of soap and water. If irritation develops, seek medical attention.

Inhalation: Move to fresh air. If symptoms persist, seek medical attention.

Ingestion: Seek medical attention immediately. Do not induce vomiting. Rinse mouth with water. Do not administer anything by mouth to an unconscious person.

General: As with any chemical, employees should thoroughly wash hands with soap and water after handling this material.

SECTION 5: FIRE FIGHTING MEASURES

Suitable Extinguishing Media: Carbon dioxide, foam, or dry chemical. Caution: Carbon dioxide will displace air in confined spaces and may create an oxygen-deficient atmosphere.

Unsuitable Extinguishing Media: Water.

Products of Combustion: Forms acrid fumes, carbon monoxide, and carbon dioxide.

Protection of Firefighters: Vapors may be irritating to eyes, skin, and respiratory tract. Firefighters should wear self-contained breathing apparatus (SCBA) and full fire-fighting turnout gear.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal Precautions: Use personal protection recommended in Section 8. Product is slippery when spilled. Isolate the hazard area. Deny entry to unnecessary and unprotected personnel.

Environmental Precautions: Keep out of drains, sewers, ditches, and waterways.

Methods for Containment: Dike spill area and cap leaking containers as necessary to prevent further spreading of spilled material. Absorb spilled liquid with suitable material.

Methods for Clean Up: Eliminate all ignition sources. Use equipment rated for use around combustible materials. Oil-soaked rags may spontaneously combust; place in appropriate disposal container.

Other Information: There are no special reporting requirements for spills of this material.

SECTION 7: HANDLING AND STORAGE

Handling

Keep away from heat, sparks, and flame. Open container slowly to release pressure caused by temperature variations. Do not allow this material to come in contact with eyes. Avoid prolonged contact with skin. Use in well-ventilated areas. Do not breathe vapors. As with any chemical, employees should thoroughly wash hands with soap and water after handling this material.

Storage

Product may be packaged in phenolic-lined, steel containers or fluorinated plastic containers. Store in well-ventilated area. Storage temperature should not exceed 110°F (43°C) for extended periods of time. Keep container closed when not in use. Air should be excluded from partially-filled containers by displacing with nitrogen or carbon dioxide. Do not cut, drill, grind, or weld on or near this container; residual vapors may ignite.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls: Provide ventilation. Keep away from sparks and flames.

Eye/Face Protection: Wear safety glasses or goggles.

Skin Protection: Nitrile gloves are recommended. Boots, apron, or bodysuits should be worn as necessary.

Respiratory Protection: Not normally required. If adequate ventilation is unavailable, use NIOSH approved air-purifying respirator with organic vapor cartridge or canister.

General Hygiene Considerations: Wash hands thoroughly after handling. Have eyewash facilities immediately available.
SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Color: Yellow
Odor: Citrus aroma
Physical State: Liquid
Boiling Point: >212°F (>100°C)
Specific Gravity: 0.881 to 0.891 @ 77°F (25°C)
Vapor Pressure: <2 mmHg @ 68°F (20°C)
Flash Point: 150°F (65.6°C)
Solubility in Water: Forms emulsion
Evaporation Rate: Medium to fast
Volatile Organic Compound (VOC) Content: 10-40% by volume

Note: These specifications represent a typical sample of this product, but actual values may vary. Certificates of Analysis and Specification Sheets are available upon request.

SECTION 10: STABILITY AND REACTIVITY

Stability: Stable.
Conditions to Avoid: Keep away from heat, sparks, and flames.
Incompatible Materials: Strong oxidizing agents, strong bases, and strong acids, including acidic clays, peroxides, halogens, vinyl chloride, and iodine pentafluoride.
Hazardous Decomposition Products: Oxides of citrus terpenes, which can result from improper storage and handling, are known to cause skin sensitization.
Possibility of Hazardous Reactions: BHT, an antioxidant, has been added to prevent oxidation. Avoid long-term exposure to air. If storing partially-filled container, fill headspace with an inert gas such as nitrogen or carbon dioxide. Hydrolysis of this product will produce methanol.

SECTION 11: TOXICOLOGICAL INFORMATION

Acute Effects
Methyl sotate has shown to have low oral toxicity (LD₅₀>5 g/kg) in rats and low dermal toxicity when tested on rabbits (LD₅₀> 2 g/kg). Citrus terpenes have been shown to have low oral toxicity (LD₅₀>5 g/kg) and low dermal toxicity (LD₅₀> 5g/kg) when tested on rabbits. Citrus terpenes also showed low toxicity by inhalation (RD₅₀>1 g/kg) when tested on mice. Product may be a skin and eye irritant. Inhalation may cause irritation of the nose, throat, and respiratory tract.

Chronic Effects
This product is not classified as a carcinogen by OSHA, IARC or NTP. This product has not been shown to produce genetic changes when tested on bacterial or animal cells. This product does not contain known reproductive or developmental toxins. Prolonged or repeated exposure can cause drying or dermatitis of skin. Improper storage and handling may lead to the formation of a possible skin sensitiser.

SECTION 12: ECOLOGICAL INFORMATION

Ecotoxicity: There is no information available at this time for this product. However, a spill may produce significant toxicity to aquatic organisms and ecosystems. Some studies have shown that certain bacteria and fungi have the ability to degrade terpenes, decreasing their toxicity to fish. When spilled, this product may act as an oil, causing a film, sheen, emulsion or sludge at or beneath the surface of a body of water.
Persistence/Degradability: Product is expected to be readily biodegradable.
Bioaccumulation/Accumulation: No appreciable bioconcentration is expected in the environment.
Mobility in Environment: Citrus terpenes volatilize rapidly.

SECTION 13: DISPOSAL CONSIDERATION

Disposal: Incinerate or dispose of in accordance with Local, State, and Federal Regulations. Taking regulations into consideration, waste may be incinerated or handled through EPA Spill Control Plan via landfill or dilution. Empty containers must be triple-rinsed prior to disposal. Oil-soaked rags should be disposed of properly to prevent spontaneous combustion.
SECTION 14: TRANSPORT INFORMATION

US DOT Shipping Classification
Proper Shipping Name: Combustible Liquid, N.O.S (d-Limonene)
Hazard Class: 3
Identification No.: NA1993
Packing Group: III

TDG Status: Not Hazardous
IMO Status: Not Hazardous
IATA Status: Not Hazardous

The listed transportation classification does not address regulatory variations due to changes in package size, mode of shipment or other regulatory descriptions.

SECTION 15: REGULATORY INFORMATION

Global Inventories
The components of this product are included in the following inventories:
USA (TSCA)
Canada (DSL)
Australia (AICS)
Europe (EINECS)
Korea (KECL)

Proposition 65: California Safe Drinking Water and Toxic Enforcement Act of 1986
This product is not known to contain any chemicals currently listed as carcinogens or reproductive toxins under California Proposition 65 at levels which would be subject to the proposition.

SARA Title III (Section 313)
This substance contains no materials subject to the reporting requirements of SARA Title III (Section 313).

SECTION 16: OTHER INFORMATION

NFPA 704: National Fire Protection Association

Health – 1  Fire – 2  Reactivity – 0

Legend
OSHA – United States Occupational Safety and Health Administration
IARC – International Agency for Research on Cancer
NTP – National Toxicology Program
NIOSH – National Institute for Occupational Safety and Health
BHT – Butylated Hydroxytoluene
EPA – United States Environmental Protection Agency

Caution: The user should conduct his/her own experiments and establish proper procedures and control before attempting use on critical parts.
